Username and Password

Areas of Kenergy's website require the use of a Username and Password as an additional security measure that helps protect your personal account information. This allows Kenergy to verify who you are, thereby allowing you access to your account information, and preventing unauthorized access. When you have finished using the My Account area of Kenergy's website, make sure you always click on the "Sign Out" button which appears on the upper right-hand side of every page in the My Account area. No further secure transactions can be conducted without re-entering your Username and Password. You should be aware that browser software often "caches" a page as you look at it, meaning that some pages are saved in your computer's temporary memory. Therefore, you may find that clicking on your "Back" button shows you a saved version of a previously viewed page. Caching in no way affects the security of your confidential Username or Password. If you use a computer in a public place to access your account information, simply quit/exit the browser software before leaving to minimize the possibility of anyone else viewing your confidential information.
